EDUCATION

- College of Engineering, Guindy** **2023 - 2027**
B.Tech. Information Technology | GPA: 7.63/10
- Bharathidasan Matric Higher Secondary School** **2022 - 2023**
State Board, Tamil Nadu | Percentage: 92.3%

CERTIFICATIONS

- NPTEL - Python for Data Science (Scored 79%)

PROJECTS

Mini Social Media Platform (Oct 2024 - Nov 2024):

- Developed a basic social media platform with profiles, sharing, and interaction features.

GT Holidays Clone (Mar 2025 – Apr 2025):

- Developed a React-based frontend clone of the GT Holidays website.
- Backend integration underway under the Naan Mudhavan initiative.

Sixth Sense(Feb 2025– Apr 2025):

- Developed an AI-powered voice assistant capable of executing tasks from sending messages to booking medicines/tickets—streamlining everyday digital interactions.
- Engineered real-time navigation across mobile UI on behalf of the user, providing touchless interaction for elderly, visually impaired, and mobility-challenged individuals.
- Showcased diverse applications in health, travel, and communication—positioning it as a next-gen accessibility enabler.

Forest Fire prediction and Stimulation

- Developed a **raster-based fire prediction and simulation web app** using **Python and Cellular Automata models** for prediction the direction and flow of fire

- We also consider the parameters like wind,slope,heat,ridge etc which play major role in fire prediction
 - Simulated **fire spread dynamics** on interactive maps through grid-based probabilistic rules.
 - Visualized real-time fire flow using **open-source geospatial mapping tools**.
-

PARTICIPATION

VIT Hackathon Participant:

- Designed an accessibility-first mobile app for the visually impaired.
- Enabled voice-controlled ride booking, food ordering, and messaging features.

Society oriented project:

- Developed a **raster-based fire prediction and simulation web app** using **Python and Cellular Automata models**.
- Simulated **fire spread dynamics** on interactive maps through grid-based probabilistic rules.
- Visualized real-time fire flow using **open-source geospatial mapping tools**.

TECHNICAL SKILLS

- Frameworks & Libraries: React , Spring boot
- Backend technology : Nodejs
- Database : postgres
- Web Technologies: HTML, CSS

LANGUAGES KNOWN:

- English
- Tamil
